The event series »Beyond the Plate« is an initiative of the FH Future Fund project »1FHSustain«. The focus is on interdisciplinarity across departments and subjects, looking beyond the plate on the topic of sustainable development and getting to know the views of people from other backgrounds.

The theme of the series of events with five Open Lectures is »Whose planet is it?«. In each case, guests will give keynote speeches, followed by a moderated discussion with the guests and the involvement of the auditorium.
