FH-Gastprofessorin Cindy Chin

With Cindy Chin, we were able to win a "NASA Datanaut" as a guest professor, who is valued worldwide as a strategic thinker and lecturer. As a visionary for future technologies, she combines many interesting areas, e.g. "Data Analytics with Space Research" - an extremely topical subject right now with the landing of the Perseverance on Mars.

The visiting professorship was donated by Salzburg AG.

Programme

17:00	Opening, Greetings and Moderation Rector Prof. Mag. Dr. Gerhard Blechinger
	Greetings by Dr. Brigitte Bach, COO of Salzburg AG
	Awarding of the designation/titel "FH-Gastprofessorin" to Cindy Chin by Rector and University Management
	Inaugural Lecture by FH-Gastprofessorin Cindy Chin Artemis Program: Humanity's Return To The Moon
18:00	Closing Address by Rector

Inaugural Lecture:

Artemis Program: Humanity's Return To The Moon

In her lecture, Cindy Chin will be covering an overview of the Artemis Program (NASA) to bring back astronauts to the moon, a brief history of the Apollo Mission and why the Artemis Mission is the pathway to the Deep Space Network and on the path from the moon to mars for humankind.
