

## Course Syllabus

Study programme	Business Management		
Course code	BWIB2CRPPT		
Course title	International Supply Chain Management Project		
Term / year of study	Winter term		
when the course is delivered			
Cycle	1 <sup>st</sup> Cycle (BA)		
ECTS credits / contact hours	4,5 / 14 (individual coaching sessions and meet- ings with project owner)		
Teaching units (hours/week - SWS)	2		
Course type	Project		
Prerequisites	B2 level in English, basic understanding of organisa- tional structures, management functions and supply chain management		
Language of instruction	English		
Course content	The design of this course focuses on the promotion of project competencies and requires the project team to interact with stakeholders embedded in the host country environment. It aims to enable incoming students to gain profound insights into the cultural, economic and social structures of the host countries. In order to achieve this the project task needs to:		
	<ul> <li>Be relevant for the regional economy</li> <li>Include aspects of the involved study pro- grammes</li> <li>Allow for a complete project run-through</li> <li>Be scientifically profound</li> </ul>		

	<ul> <li>Make considered methodical decisions, critically reflect and implement the selected method</li> <li>Synthesise, evaluate, interpret and discuss results according to scientific criteria</li> <li>Project Management competency</li> <li>Set project goals and create matching team and communication structures</li> <li>Critically reflect on the project flow</li> <li>Intercultural competency</li> <li>Reflect and document individual experiences</li> <li>Interact with external environments of the host</li> </ul>		
	learning outcomes derive: Research competency		
Learning outcomes	<ul> <li>out the whole semester.</li> <li>After completing the course students <ul> <li>Understand how to apply and to implement the principles of project planning</li> <li>Have developed research competency, particularly by applying quantitative and/or qualitative research methods</li> <li>Have increased their intercultural awareness and developed the capability to effectively perform in a multicultural team</li> </ul> </li> <li>Based on the above specified goals the following</li> </ul>		
	The participating students devise and implement the project with a supply-chain relevance independently and in a self-organised way. The project is owned by an external stakeholder and coached by internal fac- ulty that supervises and supports the team through- out the whole semaster.		

Assessment methods & criteria	<ul> <li>The project is evaluated and reflected along two criteria:</li> <li>Final presentation and critical reflection of the project findings together with the project owner and the project coach: 50%</li> <li>Project report that details methods and results as well as social and intercultural aspects of the project: 50%</li> </ul>		
Grading Scale	<ol> <li>Excellent</li> <li>Good</li> <li>Good average</li> <li>Below average</li> <li>Insufficient</li> </ol>		
Recommended resources	Gardiner, P. (2005) Project Management: A strategic planning Approach. Basingstoke: Palgrave Macmillan		
Attendance	75%
