## Course Syllabus

<b>Study programme</b>	Business Management
<b>Course code</b>	BWIB4LCSIL
<b>Course title</b>	Logistic Case Studies
<b>Term / year of study when the course is delivered</b>	Fall/Winter Term
<b>Cycle</b>	1 <sup>st</sup> Cycle (BA)
<b>ECTS credits / contact hours</b>	5 / 28
<b>Teaching units (hours/week - SWS)</b>	2
<b>Course type</b>	ILV (Interactive lecture)
<b>Prerequisites</b>	B2 level in English, basic understanding of organisational structures, management functions and supply chain management
<b>Language of instruction</b>	English
<b>Course content</b>	This lecture allows students to explore various case studies and develop an understanding of the theoretical models and approaches associated with the field of logistics and supply chain management. Through simulations and board games, students will have the opportunity to work on and apply different logistics strategies to practical, complex problems.
<b>Learning outcomes</b>	After completing the module, a student: <ul style="list-style-type: none"><li>• has an understanding of the theoretical models and approaches of logistics</li><li>• will be able to apply such models and theories to real-world problems</li></ul>
