

## Course Syllabus

Study programm	Business Management
Course code	BWIB2POPIL
Course title	Portfolio Optimization
Term / year of study	Spring/Summer Term
when the course is delivered	
Cycle	1st cycle
ECTS credits / contact hours	5 / 28
Teaching units (hours/week - SWS)	2
Course type	ILV (Interactive lecture)
Prerequisites	B2 level in English, basic understanding of organizational structures and management functions
Language of instruction	English
Course content	<ul> <li>The course aims to introduce students to the theoretical framework and empirical methods of portfolio optimization. Contents of the course include:</li> <li>Modern portfolio theory</li> <li>Parametrization of return, risk and dependencies</li> <li>Portfolio optimization</li> <li>Portfolio simulations <ul> <li>Historical simulation</li> <li>Monte Carlo simulation</li> </ul> </li> <li>Implications and recommendations</li> <li>This lecture focuses on the practical application of the taught approaches. Further the course provides a</li> </ul>

Technology Health Media

	platform to discuss the current developments in financial markets.
Learning outcomes	<ul> <li>By the end of this course, students are able to:</li> <li>Understand and apply the methods of portfolio theory</li> <li>Deal with the most important questions of the parameterization of the models</li> <li>Perform parametrizations of models using current capital market data using Excel</li> <li>Carry out optimizations with different constraints using Excel</li> <li>Critically question the results</li> <li>Understand common simulation methods</li> </ul>
Learning methods	Mixture of lectures, in-class participation, group work, and case studies using Excel
Assessment methods & criteria	<ul> <li>Group presentation of a portfolio optimization process conducted over several weeks</li> <li>Seminar paper about a portfolio optimization process conducted over several weeks</li> <li>In-class participation</li> </ul>
Grading Scale	1       Excellent       100 - 93%         2       Good       83 - 92%         3       Good average       70 - 82%         4       Below average       50 - 69%         5       Insufficient       < 50%
Recommended resources	<ul> <li>Benninga, S. (2014): Financial modeling. 4th ed. MIT Press</li> <li>Brown, K.C., Reilly, F.K., Leeds, S. (2018): Investment Analysis and Portfolio Management. 11th ed. Cengage Learning</li> </ul>
Attendance	75%

Version: 09 November 2021
